Agenda

1) Welcome and introduction
   Markus Braun, CEO

2) Building a global issuing platform
   Susanne Steidl, EVP Issuing

3) Global omni-channel PSP & payment acceptance
   Carlos Häuser, EVP Payment & risk services

4) Value added services
   Jörn Leogrande, EVP Mobile services
Building a global issuing platform by Susanne Steidl
1
Current situation: unique opportunity based on Wirecard’s ability to differentiate
The market is rapidly evolving, customers are searching for flexible but reliable service providers

Customers point of view:

- The globalisation and internet technology are forcing products that can be used globally
- Requirements regarding payments and especially issuing products are getting more and more complex due to regulation and increased technical possibilities
- Client wants one point of contact as full service provider, getting only bits and pieces is not an attractive solution in most cases
- Service provider is requested to be able to offer guidance (License options, AML, Compliance, KYC etc.) regarding various factors
- Small players cannot easily enter new markets e.g. are not able to get BIN sponsorships because they do not have the volume or customers or transactions
Current situation

Wirecard is willing to take the global opportunity

Competitive landscape:

- There is a niche that can be filled
- Competitors have a different view on the market, their focus is often more on local markets and products

- Wirecard covers the whole value chain and is focused on “the whole big thing” for issuing and acquiring
- Deep understanding of various markets and the various requirements
- Strong technology and stable platform
- Ability to scale globally
2

Wirecard’s issuing system: status quo and success stories
Wirecard’s issuing system

Issuing product portfolio

To be made available globally...

- Virtual cards
- Corporate cards
- Payout cards
- Closed loop / private label card
- Programme manager platform
- Aggregated micropayments
- General purpose reloadable card
- Gift card
- Family card
- Closed loop card
- Payment wearables
- Mobile wallet

- E-wallet / in-app payments
- Mobile banking
- Mobile payments
  - Host card emulation
  - Apple pay / android pay
  - Proxy card
- Mobile apps and SDKs
- Load & funding management
- Business intelligence & reporting
- Loyalty, couponing & cashback
- Integrated merchant billing
What makes Wirecard’s products different:

- Instant user registration, incl. all relevant PEP and sanction checks, scoring etc.
- Sophisticated risk management methods
- Mobile payments / in app payments with enhanced risk management for card not present transactions
- Ability to connect to various 3rd parties for example processors, risk engines, perso offices and financial institutions
Wirecard’s issuing system

Any of the platform solutions are configured based on market needs

- Plastic Card
  - EMV Cards
  - Dual Interface (NFC)
  - Magstripe
  - Payment Scenario: Any card payment, online or at POS

- Virtual Card
  - Payment Scenario: Payment in online shop

- Mobile Card
  - Payment Scenario: Payment at the POS with your handset by „tap & pay”

- Wearable
  - Payment Scenario: Payment at the POS with your Wearable by „tap & pay”
Mycard2Go as a success story in classic plastic cards

**MYCARD2GO**

- Buy, activate, get started – just in a couple of minutes.
- First Visa & V PAY Simply One card, ideal for world-wide payments combined with a very high safety protection standard for prepaid cards
- Mobile optimised WebUI and Mobile App

Mycard2Go is the prepaid Visa card that you can buy directly in-store. No application, no waiting time. Simply purchase, top up and conveniently pay at any location that accepts Visa worldwide – offline or online. Mycard2Go offers you absolute cost control with maximum flexibility.
Wirecard’s issuing system

MyOrder as a contactless payment product with various features

**MYORDER**

- Dutch mobile contactless payment product for open loop payments at the POS and a virtual card for eCommerce
- Full integration of in-app ordering, reservation and payment of goods, tickets, parking space, …
- Person-to-person transfer
- Location finder integrated
Wirecard’s issuing system

Also sharing expenses is made available powered by Wirecard

GRPPY

- Dutch mobile app, that helps people to share expenses in a convenient mobile way
- Create a group, invite other people. One person can do spending on behalf of the group. All users can track group spending
- Independent from the bank or payment method. Shared Wallet solution for both Android and iOS devices
Wirecard’s issuing system
boon. powered by Wirecard, first mover with a fully
digital card in apple Pay

BOON. FOR
APPLE PAY

- First fully digital card in ApplePay
- Funding via Faster Payments, Debit- or Credit Card
- Simple adding of the card to the Apple Wallet
- For every iPhone with iOS 9
Wirecard´s issuing system

Orange Cash Teen, introducing the family card concept

ORANGE CASH TEEN

- Parents / Guardians sign up their child for a Orange Cash account
- Guardian has full funding and spending control via a new web UI
- Child gets an own, fully functional Android Orange Cash Account & App
- Child account is prepaid only, MCC restricted
Wirecard’s issuing system

Travelex Supercard powered by Wirecard, to eliminate foreign currency exchange fees for travelers

SUPERCARD BY TRAVELEX

- Users simply link their credit or debit card to their Supercard through an app keeping track of their spending and fx savings
- Proxy card model
- Platform integration with expense management tools
- Customer perception of free FX
Wirecard’s issuing system

CURVE app, carry all your cards in one card

CURVE

- Connect unlimited number of bank cards into one physical payment card, accepted everywhere
- One PIN for all the cards and accounts
- Transactions for all accounts in one screen in real-time
Wirecard’s issuing system

Wirecard’s issuing platform – behind all the success stories

- **Wirecard Provided Frontends**
  - 3rd Party Solution Frontends
  - 3rd Party Solution Backends
  - Additional 3rd Party Services

- **Wirecard Issuing Platform**
  - Consumer Module
  - Accounting Module
  - Funding Module
  - Card Module
  - Loyalty Module
  - Risk and Fraud Module

- **OCT, Refunds**
  - Wirecard Processing Engine
  - Card Payments
  - Payments
  - Wirecard Payment Gateway

- **OMT, SEPA DD**
  - OCT
  - Wire transfer
  - Card Schemes
  - Mastercard
  - Visa
  - UATP
  - OMT
  - SEPA DD
  - SEPA
  - UK

Taking advantage of the opportunity: flexible global scaling alongside the value chain
Enabling a global coverage with a flexible collaboration model

BIN sponsor
- Holding authorised scheme memberships (MC, Visa)
- Issuance of cards for program manager
- Holding program funds, daily settlement with schemes
- KYC & sanctions screening
- Fraud, disputes and chargebacks
- Suspicious transaction monitoring and reporting
- Scheme reporting
- Risk management

Programme manager
- Develop and launch prepaid products, promote in market
- Contract with corporate clients, manage implementations
- Provide core program technology
- Process client instructions, produce and distribute cards
- Provide cardholder and client servicing and reporting
- Fraud and suspicious activity monitoring for BIN sponsor
- Support BIN sponsor in meeting AML requirements
- Financial reporting of programs and business
- Strategic vendor management

Payment processor
- Processing all POS, E-Commerce & ATM transactions on the cards
- Processing loads to cards, holding card balances
- Maintaining cardholder authorisation parameters
- Processing connections to the schemes
- Risk management
- Reporting to BIN sponsor
- Control cardholder access (e.g. block suspected fraud)
- Disputes and chargeback administration

Card bureau
- Provides plastics and co-ordinates card design personalisation and distribution
- Provides PIN mailer along with other forms of material (card carrier, etc.)
- Provides fulfilment
- Provides card replacements
Taking advantage

The Wirecard system can connect to various parties globally to make services available for the customer.

Wirecard issuing platform

- Consumer Module
- Accounting Module
- Funding Module
- Card Module
- Loyalty Module
- Risk and Fraud Module (KYC, AML, …)

Payment processor

- Perso offices

Tokenization (HCE/MDES/VTS)

Payment methods (> 80)

Risk management

- Scoring agencies
- Risk engines
- Regulatory reporting
- Sanction checks
- PEP lists
- …
Taking advantage

Accessing the full spectrum of services via easy to integrate APIs (1/2)

Server to client interfaces

- Interface based on restful web services
- Optimised for usage with end consumer client devices
- Token authentication concept to avoid storage of basic authentication data on client devices
  - Configurable token levels per web service
  - Configuration of lifetime and number of usages per token level
- Security proxy and certification system
  - Web services are reachable only with proper client certificate
  - Web services hidden behind high risk or low risk proxies
Taking advantage

Accessing the full spectrum of services via easy to integrate APIs (2/2)

Server to server interfaces

- Interface based on restful web services
- Optimised for usage with 3rd party backend solutions or client applications that require a view on several customers
- Authentication based on technical user concept
  → Customers have to be selected by customer search
- Security proxy and certification system
  - Web services are reachable only with proper client certificate
  - Web services hidden behind high risk or low risk proxies
  - Certificate configuration per single web service
Enabling globalisation with the Wirecard issuing platform

- Wirecard has an own banking (DE) and e-money license (UK) usable for issuing in the European market
- Wirecard Processing as flexible processing provider for projects all over the world
- Wirecard’s call center with the ability to cover various languages
- Existing relationships to multiple perso offices
- Ability to work with various 3rd parties all over the world
Partners making globalisation possible: BIN Sponsors & Processors

**BIN sponsor**
- Holding authorised scheme memberships (MC, Visa)
- Issuance of cards for Program Manager
- Holding program funds, daily settlement with schemes
- KYC & sanctions screening
- Fraud, AML, disputes and chargebacks
- Suspicious transaction monitoring and reporting
- Scheme reporting
- Risk management

**Processor**
- Processing all POS & ATM transactions on the cards (EMV, Magstripe)
- Processing E-Commerce and card not present transactions
- Processing loads to cards, holding card balances
- Connecting to local ATM networks
- Maintaining cardholder authorisation parameters (fees, limits, CVM, 3DS)
- Processing connections to the schemes
- Risk management
- Reporting to BIN Sponsor
- Control cardholder access (e.g. block suspected fraud)
- Disputes and chargeback administration

- Collaborations with BIN sponsors to be able to issue cards in countries not covered with own license as well as specific requirements e.g. on KYC

- Collaborations with Processor e.g. in case on-site processing is required or an existing beneficial connection to an ATM network
Partners making globalisation possible: Perso office & call center

**Perso office**
- Provides plastics and co-ordinates card design personalisation and distribution
- Provides PIN mailer along with other forms of material (card carrier, etc.)
- Provides fulfilment
- Provides card replacements
- Supports various form factors
- Take care of card shipping (individual and bulk)

**Call center**
- Offer 1st Level Support
- Support of local language(s)
- 24/7 lost and stolen hotline
- Host IVR
- Provide local dial in numbers

- For on site-issuing of cards to make to process faster and more cost efficient (shipping) local perso offices can be used
- Collaborations with various call centers to cover the languages in the local markets as well as providing 24/7 support globally
Widening the scope
Driving financial inclusion with global money remittance

Global remittance: Wirecard with partners

- Global coverage based on Western Unions existing network
- Sending corridor between two BIN sponsors
THANK YOU

Current differentiators in PSP & acquiring services
Current differentiators in PSP and acquiring services

Value proposition of Wirecard

1. True omni-channel payment support
2. Industry leading consumer related risk management and scoring offering
3. Industry leading fraud prevention services with high quality base rule sets per industry segment
4. Highly skilled and trained risk analysts to support and consult merchants
5. Acquiring proposition on 45 payment methods
# Current differentiators in PSP and acquiring services

## Product overview – risk management and fraud prevention options

### Credit rating & data cleansing methods
- Address normalisation
- Address verification
- Doublet identification
- Address hotlist
- Sanctions pool
- Credit scoring (B2B and B2C)

### Transaction fraud prevention methods
- 3-D Secure™
- CVC verification
- Account validation
- IP/BIN verification
- Velocity checks
- AVS
- Hotlists
- Rule engine
- Device fingerprint

### Analytics
- Payment defaults and fraud patterns analytics
- Financial performance of rules
- Fraud indicator relevance and accuracy

### Rule / decision management
- Standard rule library
- Premium rule Template library
- Custom rules & decision logic
- Advanced rule Template library
- Custom rules
- Custom pattern Detection logic

### Case management
- Built-in web-based case management console.

---

1) Different best practices to be applied for different industries, businesses and payment methods.
2) Requires consulting services available with Wirecard Professional Services.
3) Requires managed services package.
Current differentiators in PSP and acquiring services
Risk management and fraud prevention options - benefits

Reduce your fraud by...
- detecting fraudulent behaviour (patterns) automatically,
- incorporating market specific data into the fraud decision process, including itinerary information such as departures, stopovers, arrivals and airport information.

Decrease your costs by....
- reducing chargebacks, safeguarding against surcharges and fines
- reducing the number of transactions being queued for manual review,
- decreasing time spent on processing exceptions (chargeback notifications, etc.).

Optimise your revenue by...
- accepting more genuine business,
- identifying and protecting your „good“ customers.

Thus optimising sales conversion, while minimising fraud risk and manual review and associated costs.
2

Trends in PSP services
Trends in PSP Services

Optimising customer conversion

1. Transformation of Risk Management & Fraud Prevention towards an active of consumer conversion tool
2. Dynamic consumer individualised checkout process
3. Market relevant mix of payment methods
4. Introduction of alternative payment acceptance in point of sale environments
Trends in PSP Services

Data driven services

1. Measurement of conversion rates and consumer behavior during checkout process
2. Peer group analysis of transaction data
3. Analysis of shopping baskets across channels and consumers
4. Market insights and comparison across different regions
European trends and opportunities

1. Account Information APIs as result of Payment Service Directive 2.0
2. Pan-European realtime payments with payment guarantee through payment initiation APIs
3. Extended risk management and scoring services
Global trends and opportunities

1. POS terminal consolidation at the retail outlets and requirement for omni-channel frontends
2. Smart POS terminals based on state-of-the-art technology allowing for new and innovative services
3. Widespread governmental initiatives to convert into cashless societies
3
Service globalisation
Service globalisation

Vision 2020 – global payment provider

Status quo

• Leading position in Europe
• Dominant position in Southeast Asia
• Market entry in North America
• Global provision of payment technology
• Global airline & travel licences
• Adding relevant global markets
• Adressing needs of local and global merchants

Vision 2020

Adressing all relevant global markets with:

• Global payment technology
• Global licensing framework
• Global risk management
• Global provision value added services and big data
• Hubs in all relevant geographies
Globalisation of service offerings

1. Distributed deployment of PSP processing infrastructure
2. Localisation of support services on global payment infrastructure
3. Extension of acquiring capabilities through own licenses as well as through BIN sponsorship agreements
4. Extension of consumer identification services in risk management
4 Technology trends
Vision statement

“Wirecard offers an open payment platform based on newest technologies enabling merchants, merchant system providers and related communities to easily facilitate accepting payments and managing existing and new, innovative payment methods and related processes, such as risk management, fraud prevention, recurring payment handling, etc. in an easy and flexible way. Clients of Wirecard’s PSP platform will be capable of customising and extending the already rich feature set to support their business models in the best possible way, making payments the least of their worries thus enabling focus on accelerating their own business growth.

One platform with one coherent interface and integration options across all channels will enable merchants to accelerate their business with a real cross channel solution and optimise their business insights based on one reconciliation and one reporting interface with all relevant business related information across all channels. Self-service administration capabilities will enable merchants to tune their payment process based on data analytics in regards to acceptance rates, transaction costs, conversion rates and alike.

Wirecard will, in addition to self-service capabilities, offer best in class support services helping merchants to benefit from broad and in-depth payment knowledge.”
Technology trends

Technology trends in the financial industry

1. Digital transformation
2. Open APIs
3. Blockchain
4. Android and Linux based POS terminals
5. Internet of things

Introduction
Mobile services definition

Mobile Services is a product division of Wirecard.

We are developing holistic solutions for mobile platforms like IOS, Android or Windows Mobile.

We are partnering with mobile technology providers like Alipay and startups like Bijli. And we are solution provider for retailers like Munich Airport, Printemps, Berjaya and international banks like DBS or CIMB.
Overview – current challenges in retail
Overview

Omni-channel

The days of mono-channel and the undigital shopper are over.

8 out of 10 consumers globally use a computer, smartphone, tablet or digital in-store technology while shopping\(^1\).

Even while in-store 42% of consumers conduct research online via a smartphone or other technology\(^2\).

Consumers don’t differentiate their shopping experiences by channel, and if retailers want to thrive in the digital age, they must align to the customer expectations – not the other way around.

\(^1\) Forrester Research, “Customer Desires vs. Retailer Capabilities: Minding the Omnichannel Commerce Gap”

\(^2\) MasterCard, “The Omnishopper Project, 2015”
Retail challenges

- Data driven commerce: Consumers have become more demanding – driven by new technology and the real-time capabilities it enables. This is why real-time, data-driven retail is the new imperative.

- Empowering shop associates: Sales associates have historically served as a source of relatively static information. That’s no longer enough for today’s digitally empowered shoppers.

- Personalisation: Customers expect that when entering the store, retailer is aware of their browsing/purchase history, personal preferences & loyalty status

- Alternative payment schemes: Over 64% of customers prefer to shop at retailers that provide mobile wallet payment options and approximately the same amount would spend more if they could use mobile wallets to pay for items

- New fulfilment options: Half of all consumers cite click-and-collect as important or very important when shopping online, although only a third of retailers today support store-pickup programs.

Partnerships – O2 eKasa system

Platební terminál získáte zdarma
Náš mobilní terminál zvládne magnetické, čipové, klasické i bezkontaktní, kreditní, debetní i stravenkové platební karty. A čím více plateb kartou přijmete, tím víc ušetříte. 

Pokladní tiskárna účtenek
Lehká. Mobilní. Vždy po ruce. Přijmout platbu a vytisknout účtenku bude otázka chvílky. Účtenky tiskne technologií Termo ve formátu 58 mm.
Mobile services solution portfolio

Innovation – Wincor albert

Touch Screen  NFC Reader
Smart Card Reader  7” Display  Gorilla Glass

Printer Module
8 Mpx Camera
Couponing & loyalty

Wirecard’s innovative Card-Linked Offers Platform offers a fully integrated mobile loyalty experience. The loyalty backend allows the setup of flexible campaign schemes and redemptions in real-time. Single tap loyalty fully integrated in the payment process.
OFFER STREAM

- Offer stream shows overview of all available campaigns by category, date and location
- Possibility to prioritise display of offers by campaign type e.g. by program manager, merchants, location or interest of consumers
- Support of punch cards, promotions, incentive programs, spending targets, top-up and signup bonus campaigns
- Multiple visualisation capabilities for campaigns including multi-media content and various text formatting options or style-sheets
- Example shows live deployment with Orange in France and Spain
SELF-SERVICE PLATFORM

- **Enrollment process and merchant profile:** Merchants can conveniently sign up and create their own merchant profile and see real-time reporting.

- **Campaign setup:** Merchants can choose from a list of popular campaigns or create their own offers and loyalty programs.

- **Operator access:** Operators can moderate merchants and campaigns and access all reporting.
Case study – target customers with orange cash

Which data is accessed to target Orange Cash customers?

**SENIORITY**
When did customers register to orange cash?

**PURCHASE BEHAVIOR**
How much did customers pay?
How often did customers pay?

**PROFILE**
Where do customers come from?
Which demographic data is related to my customers?
Mobile services solution portfolio

Case study – target customers with orange cash

HOW DOES THE FRONTEND LOOK LIKE?

Merchants within Orange Cash can set up their own campaigns.

Targeting parameters for campaigns are freely configurable by merchants.
Connected POS

Wirecard`s own connected POS technology enables legacy POS systems for cutting-edge solutions in payments and value added services.
Mobile services solution portfolio

Connected POS

How can retail stores benefit from big data?
Mobile services solution portfolio

Connector device

- Smart device made for the Point of Sale
- Interface between cash registers and cloud infrastructure
- Provides connectivity
- No integration into retailer networks
- Easy to deploy
ALIPAY MOBILE PAYMENT

- Use QR code for payment with Alipay app
- QR scanner is separate from POS, no intrusion into POS system
- Faster than credit card payment
- POS process remains business as usual
Mobile services solution portfolio

POS integration using POS connector

Requirements
- POS system offers terminal interface or terminal is already in place

Advantages
- Quick installation, no new software required (no intrusion into POS system)
- No space required at counter (except scanner)
- Confirmation is printed on POS printer or separate printer
- No connection to network/LAN required
Mobile services solution portfolio

- MOBILE POS
- E-RECEIPT
- ANALYTICS
- BEACONS
- ADVERTISING
- COUPONING & LOYALTY
- NEW PAYMENT
- POS INTEGRATION
4
Smart data analytics
Smart data analytics
Create value with data

**MERCHANT LOCATIONS**
At which places do my consumer prefer to buy?

**PRODUCT ITEMS**
At which places do my consumers prefer to buy which products?

**LOCALISATION OF CUSTOMERS**
At which places do my consumers prefer to buy which product – and how do they get into stores?
Smart data analytics

Example algorithm: customer potential

- Understand consumer journey through transactions by users per merchant category code
- Display merchant market share on basic transaction information.
- Enrich transaction data with consumer profile information

![Pie chart showing distribution of customer segments: 68% Potential customer, 15.2% Loyal customers, 14.5% Dissatisfied customers, 1.6% Neutral customers, 0.7% Customers frustrated by competitors.]

© 2016 Wirecard AG
Example clustering: customer journey

- Clustering merchant’s consumers with merchant categories
- Monitor how consumers purchase and where they purchase afterwards
- Match product sales, campaigns with consumer’s purchase journey
Smart data analytics

Example clustering: customer journey

- Where do users come from?
- How many customers are located in near regions?
- In which merchant categories do my customers purchase in merchant stores?
Smart data analytics

Scoring system for brands and retailers

DATA

- Average amount spent by consumers at relevant merchants:
  - Transactions
  - Item level transactions
  - Customer profile
  - Campaign success rate
  - Customer geolocalised information
- Consumer purchase power in shops
- Numbers of Merchants visited
- Identification of relevant customer groups
- Density of local competitors

SCORING ALGORITHM

SCORE

- Conversion optimisation
- Effective customer acquisition
- Highly targeted promotional offers
- Stock planning
- Recognise cross-selling and up-selling potentials
- Effective basket analysis
- Recognize spill over effects
- Effective exploitation of seasonal/periodic effects
